PROFESSIONAL SUMMARY

I am Senior Software Engineer and Systems Architect with 15+ years of experience designing scalable software systems, data-driven platforms, and enterprise applications. My knowledge combines strong foundations in Mathematics and Physics with advanced Software Engineering expertise to solve complex computational and real-world problems. Experienced in backend architecture, APIs, databases, and system optimization with a strong focus on reliability and performance.

CORE COMPETENCIES

- Full-Stack Software Development.
- System Architecture & API Design.
- Database Engineering & Optimization.
- Algorithms & Computational Modeling.
- Automation & Process Optimization.
- Cloud & Linux Systems Administration.
- Debugging & Performance Tuning.
- Technical Leadership & Mentoring.

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, PHP, SQL, HTML5.
Frameworks: Node.js, React.js, Laravel.
Databases: MySQL.
Tools: Git, Linux, REST APIs, .
Concepts: OOP, MVC, Distributed Systems, Authentication & Security.

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Ontario & Remote | 2018 – Present

- Designed and deployed scalable web platforms and automation systems.
- Architected RESTful APIs supporting web and mobile applications.
- Built secure authentication, role management, and transaction systems.
- Optimized database performance and improved application stability.
- Integrated third-party services such as payment processing, messaging and notifications.

Software Developer and Systems Analyst

Toronto Technology Solutions, Ontario | 2013 – 2018

- Developed enterprise web applications and reporting dashboards.
- Implemented analytics tools supporting operational decision-making.
- Managed Linux servers and deployment environments.
- Automated workflows reducing manual processes.

Junior Programmer / Developer

Information Systems Department | 2010 – 2013

- Built internal management tools and data processing utilities
- Assisted in database design and debugging legacy systems
- Improved performance and reliability of existing applications

EDUCATION

PhD — Computational Mathematics & Computer Science
University of Waterloo, Ontario
2014 – 2018

Master of Software Engineering
Toronto Metropolitan University, Ontario
2011 – 2013

Bachelor of Science — Physics
York University, Ontario
2006 – 2010

SELECTED PROJECTS

- Enterprise management and reporting platform
- Automated notification and transaction processing system
- Web-based booking and user management applications
- Data analysis and forecasting tools

PROFESSIONAL STRENGTHS

- Strong analytical problem solving from mathematics background
- Ability to translate theory into production-ready software
- Clear documentation and communication
- Reliable independent and collaborative contributor
